

## 64 Series

Our 64 series accommodates a 64mm stud with a single layer of plasterboard on each side, making it the ideal system for dividing up your office space. With the wide range of profiles, you can achieve exactly the look you want, be it a negative detail, varying door thicknesses or offset glazing when in conjunction with our Acoustic & Edge ranges. Our 64 series is widely used in both commercial office fitouts, and the education sector.

- Suited to 64mm stud
- Designed for ceiling heights up to 3.2m (but not limited to)
- 103mm wide and profile heights of 25mm to 44mm
- Easily accommodates 12.38mm Laminated glass
- Built in screw ports and staking bracket locators
- Negative detail options available
- Seismic head track option available
- Range of options for mullions, transoms & door frames
