

# MultiLayer

Our Multilayer range is designed to allow multiple linings of plasterboard and achieve greater wall strength and acoustic ratings. This system is the preferred option when you need a thicker wall, or want a different look for your next fitout. With profile widths ranging from 116mm to 158mm, there is an option for almost any lining selection.

- Suited to both 64mm and 92mm stud walls
- Integrates with both 64 Series and 92 Series
- Multiple linings to suit any application
- Built in screw ports and staking bracket locators
- Can be used independently or in conjunction with ASL head tracks
